

ATTENTION:
Only one regulator (IC1 or IC4) have to be installed!

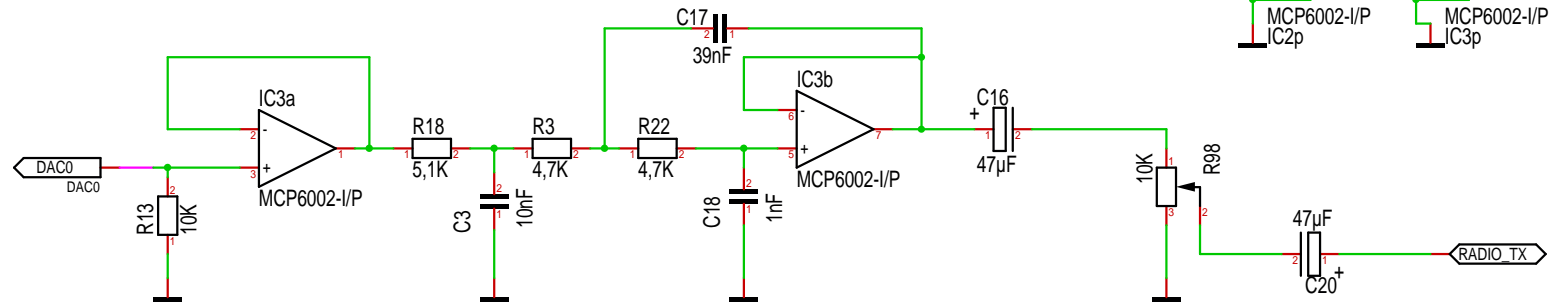

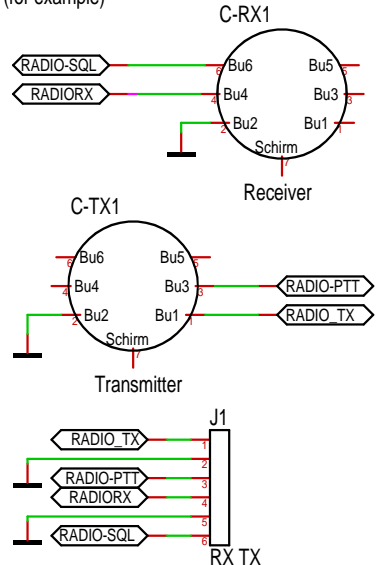

ATTENTION:
For testing purposes
Close JP5 & JP6 only without radio connected
In normal use, JP5 & JP6 must stay OPEN

ATTENTION:
Only one Q (Q2 or Q3) have to be installed!

Same connectors as DVRPTR v1 or Kenwood TM451 Transceivers (for example)

The TCXO must be HCMOS (than output is 3.3V) and a good stability (-2ppm)
